

Dear Hiring Manager,

I am writing to express my interest in the AI Internship opportunity at Goldman Sachs. As a Computer Science undergraduate with hands-on industry experience in Generative AI, I am eager to apply my technical skills to develop intelligent, scalable solutions while learning from one of the world's leading technology-driven financial institutions. Goldman Sachs' commitment to leveraging artificial intelligence and advanced engineering to solve complex business challenges strongly aligns with my passion for building impactful AI systems.

During my internship as an AI Intern, I contributed to the development of backend infrastructure for Generative AI applications. I designed and implemented concurrent task orchestration using Java's Executor Framework and CompletableFuture, enabling asynchronous execution, thread tracking, selective task cancellation, and real-time job monitoring. These enhancements improved resource utilization and reduced redundant AI requests, providing valuable experience in building efficient, scalable systems that support AI-powered applications.

Motivated to deepen my expertise in Generative AI, I have continued working on projects involving LangChain, LangGraph, Retrieval-Augmented Generation (RAG), FastAPI, Docker, and vector databases. Through these projects, I have gained practical experience in designing AI agent workflows, retrieval pipelines, prompt orchestration, and backend architectures for LLM-powered applications. I enjoy solving complex engineering problems and continuously exploring new techniques to build reliable and production-ready AI solutions.

I am particularly excited about Goldman Sachs because of its strong engineering culture and the strategic role artificial intelligence plays in transforming financial services. The opportunity to work alongside experienced engineers to develop scalable AI solutions for real-world applications is an exciting prospect. I am confident that my internship experience, strong technical foundation, adaptability, and enthusiasm for AI would enable me to contribute meaningfully while continuing to grow as an engineer.

Thank you for considering my application. I would welcome the opportunity to discuss how my experience and passion for Generative AI align with the goals of Goldman Sachs. I appreciate your time and consideration and look forward to the opportunity to interview with your team.

Sincerely,

Nitesh Kumar Pandey
